# SGE Circus

You do not necessarily need to perform magic … but it helps a lot.

The SGE Circus broadens the horizon in terms of measurement data analysis, map optimization and model based calibration.

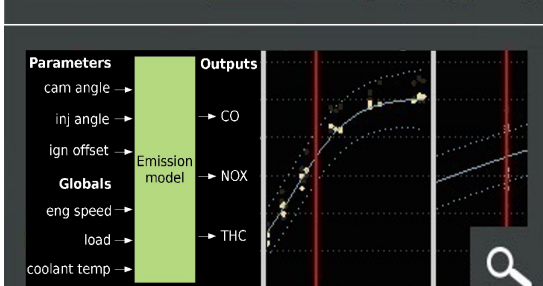

MapArtist

The MapArtist is the star in the ring, when on the fly maps are created from data, displayed and edited.

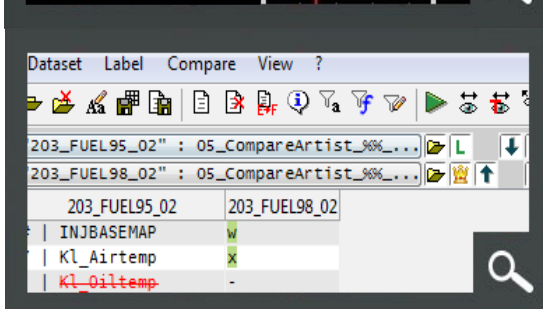

DataArtist

The DataArtist is our magic wand in terms of visualizing and processing measurement data.

ModelArtist

The ModelArtist is a tool to visualize and model multirelational data as well as to enable model based calibration.

CompareArtist

The CompareArtist is a tool to compare datasets and visualize their differences.

SGE Circus

Licensing

A valid license is required to use the SGE Circus. This can either be linked to the computer hardware or to the registered user name (only in networks with domain controllers and central user management). In addition, network licenses are available, which also allow the permanent borrowing of licenses to operate without connection to the license server.

Two license validation options are available. The one-year license incl. support and maintenance and the unlimited license for which support and maintenance must be purchased separately from the second year if desired.

Free trial

The SGE Circus with limited functionality is immediately available for [download](#) and testing. We will be happy to provide you with time-limited test licenses with unlimited functionality. Contact us (circus@sge-ing.de) if you would like to test the SGE Circus and experience the magic.
